

# Turnkey Construction Services

ERVP Engineering offers comprehensive turnkey construction services, delivering projects from concept to completion under a single point of responsibility. Our integrated approach ensures cost efficiency, timely execution, quality control, and complete transparency throughout the project lifecycle.

## Our Turnkey Construction Capabilities

### 1. Project Planning & Feasibility

- Site assessment and feasibility studies
- Budget estimation and cost optimization
- Construction scheduling and risk analysis
- Regulatory and statutory compliance planning

### 2. Design & Engineering

- Architectural and structural design
- Highway, road, bridge, and infrastructure engineering
- Value engineering for cost and performance optimization
- Compliance with IRC, IS codes, and national standards

### 3. Procurement & Resource Management

- Material sourcing from approved vendors
- Equipment and machinery management
- Vendor coordination and quality assurance
- Supply chain optimization to avoid delays

### 4. Construction & Execution

- Civil, industrial, and infrastructure construction
- Road, highway, bridge, and urban development projects
- Quality-controlled execution with on-site supervision
- Safety management and environmental compliance

## 5. Quality Assurance & Monitoring

- ISO-aligned quality control processes
- Regular inspections and testing
- Progress tracking and reporting
- Performance audits and corrective measures

## 6. Testing, Commissioning & Handover

- Final inspection and testing
- Documentation and as-built drawings
- Client walkthrough and approvals
- Smooth project handover within committed timelines

## Industries We Serve

- Road & Highway Infrastructure
- Bridges & Transportation Networks
- Industrial & Commercial Construction
- Urban Infrastructure & Smart Development Projects
