

Design & Engineering Consultancy Services

ERVP provides comprehensive Design and Engineering Consultancy Services with a strong focus on Pre-Bid Consultancy for infrastructure and development projects. Our services help clients prepare technically sound, compliant, and competitive bids by addressing design, engineering, and documentation requirements before tender submission.

Scope of Pre-Bid Consultancy Services

Our pre-bid consultancy services include:

- Review and understanding of tender documents and project scope
- Technical feasibility assessment and design review
- Preliminary engineering inputs and concept validation
- Identification of technical risks and mitigation strategies
- Support for pre-bid queries and clarifications
- Assistance in preparing technical proposals and bid documentation
- Coordination with multidisciplinary teams for integrated solutions

Design & Engineering Expertise

ERVP offers engineering consultancy across multiple infrastructure sectors, including:

- Roads & Highways
- Bridges and Flyovers
- Railways and Metro Projects
- Underground Structures
- Urban and Transport Planning
- Industrial and Real Estate Projects
- Water and Environmental Engineering

Our team ensures that all designs and technical inputs meet applicable codes, standards, and client requirements.

Key Deliverables

- Technical notes and design briefs
- Preliminary drawings and layouts
- Design analysis and review reports
- Compliance and checklist documents
- Pre-bid clarification responses
- Bid-ready technical documentation

Experienced engineering and design professionals Strong focus on accuracy, compliance, and quality Proven expertise in pre-bid and tender support services Timely delivery aligned with bid schedules integrated design and consultancy approach

Value Delivered

Our cost estimation services help clients:

- Prepare accurate and competitive bids
- Reduce financial uncertainty
- Improve project profitability
- Support informed decision-making
- Minimize cost overruns
